Additional  
manufacturing  
locations:

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended

## STANDARDS :

The equipment and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards

**IEC 60079-0:2017** Explosive atmospheres - Part 0: Equipment - General requirements  
Edition:7.0

**IEC 60079-18:2014** Explosive atmospheres – Part 18: Equipment protection by encapsulation "m"  
Edition:4.0

**IEC 60079-28:2015** Explosive atmospheres - Part 28: Protection of equipment and transmission systems using optical radiation  
Edition:2

**IEC 60079-31:2013** Explosive atmospheres - Part 31: Equipment dust ignition protection by enclosure "t"  
Edition:2

**IEC 60079-7:2015** Explosive atmospheres – Part 7: Equipment protection by increased safety "e"  
Edition:5.0

This Certificate **does not** indicate compliance with safety and performance requirements other than those expressly included in the Standards listed above.

## TEST & ASSESSMENT REPORTS:

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in:

## **EQUIPMENT:**

Equipment and systems covered by this Certificate are as follows:

Depending on the variant, the light fixtures type EXF-...LED and EXL-...LED are suitable for use in indoor and outdoor installations in zones 1, 2, explosion hazard of gases, vapors and mists of flammable liquids with air explosive groups IIA, IIB, IIC, as well as zones 21, 22 explosion hazards of combustible dusts and fibres belonging to explosion groups IIIA, IIIB, IIIC.

Light fixtures are made as increased safety equipment. The mounting plate and fixing brackets are made of powder-coated galvanized sheet of steel.

The connectors used ensure that the cable conduits are firmly secured.

Also for the LED modules used in the light fixtures type EXF-...LED are the types of protection: encapsulated „m“ and protection of devices using optical radiation.

Description of type key and technical parameters are included in CoC Attachment.

## **SPECIFIC CONDITIONS OF USE: YES as shown below:**

Do not allow dust to accumulate on the light fitting. Cleaning have to be carried out using vacuum cleaners or a soft cloth with antistatic agent suitable to working conditions. Do not use chemicals that can damage an part of the light fitting.
